Assignment –2
Introducing Relational Databases.

1)   Which field of the Customers table is the primary key?

Ans:

The primary key of the Customers table is Cnum (Customer Number), as it uniquely identifies each customer in the table.

2)   What is the 4th column of the Customers table?

Ans:

The 4th column of the Customers table is Rating.

3)   What is another word for row? For column?

 Ans:

Another word for row is tuple or record.

Another word for column is attribute or field.

4)   Why isn't it possible to see the first five rows of a table?

Ans:

This likely refers to the way a database system retrieves or displays data. If there is no specific command issued (like LIMIT in SQL), the database might not automatically show a specific number of rows. It may depend on the user's query, or the way the database interface is set up to display results.
